Bootstrap

LANGUAGES

Spanish(Native)

English(Advanced)

ABOUT ME

Born in Mar del Plata, Buenos Aires, Argentina in July 1999, in a family in which english is almost like a second native language, I've always been attracted to technology, either because of videogames or because I wondered how computers worked and dreamed of working in a big tech enterprise. When I turned 18, I started studying Systems Engineering. Some of my soft skills are:

- Problem resolution and logical thinking.
- Verbal and written communication in english and spanish.
- Team and individual work .
- Adaptability. Quick learning to be able to efficiently work with the required technologies and teams.

EXPERIENCE

4/2022 -

Universidad Adventista del Plata
FullStack Developer

- Requirements analysis and application design.
- Design of data structures and management of roles and privileges in PostgreSQL.
- Collaborative and individual Front End and Back End development with Ruby on Rails.
- I designed and built a functionality for the Student Portal through which students can self-manage their regular student and admission certificates, which saves them lots of time.
- I fully developed a web application through which students can verify the validity of their certificates and at the same time prevents the falsification of said documents.

EDUCATION

2018 - 2022

Systems Engineering - December

Student - Universidad Adventista del Plata

- **2018 - 2022** I took part in multiple software projects, from taking requirements to programming and putting in production. You can take a look over [here](#).

- **2020** I was chosen as Assistant Professor of the Bases de Datos (Databases) subject.

2018 - 2020

Systems Analyst

Graduated - Universidad Adventista del Plata
